| Stock               | Short Term | Long Term | Prevailing Bias | Remarks   |
|---------------------|------------|-----------|-----------------|---|
| Essar Oil           | Strong     | None      | Strong          | If it breaks 150 which I believe it will do, it goes to 170 on strong volumes   |
| Aban Offshore       | Weak       | Weak      | Strong          | The stock's heading to 650-700. Volumes have collapsed  |
| Indorama Synthetics | Strong     | Weak      | None            | It has had a vertical rise since 40. Such stocks provide short term (7-10 day) gains. But watch for a drop in volumes |
